DETAILED ACTION

1. This action is responsive to the application filed on May 12, 2002. Claims 1-12 are now pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Levy (U.S. Patent Number 6,556,997).

4. Levy has disclosed:

- <Claim 1>

A method for sending a web page to a remote facsimile (fax) machine to be printed comprising:

providing a first computer capable of accessing a web page; (Fig. 1, 11; Column 3, lines 66-67; Column 4, lines 1-13)

providing a fax machine identified by a fax number capable of receiving fax signals; (Fig. 1, 13; Column 3, lines 66-67; Column 4, lines 1-13)

providing a transmission means connecting the fax machine to the first computer; (Fig. 1, 13; Column 3, lines 66-67; Column 4, lines 1-13)

converting the web page into a fax signal; (Column 5, lines 20-30)

transmitting the fax signal from the first computer to the fax machine identified by the fax number through the transmission means; and (Column 5, lines 8-10; lines 20-30)

receiving the fax signal at the fax machine. (Column 5, lines 20-33)

- <Claim 2>

The method of claim 1 further comprising using the fax machine to print the fax signal immediately upon receiving the fax signal. (Column 7, lines 34-37)

- <Claim 3>

The method of claim 1 further comprising storing the fax signal in a buffer of the fax machine. (Inherent feature of a fax machine)

- <Claim 4>

The method of claim 1 wherein the web page is converted into the fax signal by using the first computer. (Column 5, lines 20-28)

- <Claim 5>

The method of claim 1 wherein the first computer has a user interface, the method further comprising using the user interface to control conversion of the web page into the fax signal and sending of the fax signal to the fax machine. (Column 3, lines 66-67; Column 4, lines 1-13)

- <Claim 6>

The method of claim 1 further comprising transmitting the fax signal to the fax machine again if a previous transmission of the fax signal to the fax machine fails. (Column 5, lines 30-33)

- <Claim 7>

The method of claim 1 wherein the fax signal is a bitmap image. (Column 5, lines 20-28)

- <Claim 8>

The method of claim 1 further comprising storing the fax signal in a temporary file in the first computer. (Fig. 7; Column 5, lines 30-33)

- <Claim 9>

The method of claim 1 wherein the web page is downloaded to the first computer from Internet. (Column 4, lines 1-8)

- <Claim 10>

The method of claim 1 further comprising:

providing a second computer connected to the first computer through a computer network; and (Fig. 1, 11 and 12)

using the second computer to convert another web page into another fax signal and sending the fax signal to the fax machine through the first computer. (Column 4, lines 42-54)

- <Claim 11>

The method of claim 10 wherein the computer network is Internet. (Fig. 1, 14)

- <Claim 12>

The method of claim 10 wherein the second computer has a user interface, the method further comprising using the user interface to control conversion of the web page into the fax signal and sending of the fax signal to the fax machine. (Column 4, lines 42-54).
